

Message from the Principal

Kia Ora Tatou Katoa

Many of our students will also have the opportunity to work alongside employers from within our community as part of their academic programmes as we intergrate academic and hands-on-learning. "Working together to provide a quality education in a caring environment" sums up our school vision.

Within this curriculum our students are academically challenged in a context of personalised learner-centered education. Every effort is made to promote a love for learning and positive attitudes about success, so that our students can move successfully into life beyond school. Morrinsville college is growing a school culture that they feel they truly belong to and be proud to identify with well after they have left.

The school aims to produce confident, tolerant, connected, life-long learners who are actively involved in a balanced lifestyle. We encourage the growth of dispositions whereby students will be able to work well in teams, effectively manage a wide range of technological tools and manage themselves within an increasingly complex world. We encourage situations that will allow our students grow their ability to have mature conversations and feel equally comfortable, mixing, integrating and socialising with those who are younger or older than themselves or who are from other cultures or who have different world views. Our ambition is for our students to aspire to be the very best of themselves and to see the possibilities for their future self. We very much look forward to your being part of our school community.

Scott Jenkins
Principal
